WHAT IS USE.AI?

Use.AI is the unified workspace where AI, knowledge, and collaboration converge. It gives individuals, teams, and enterprises a single environment to think, build, and execute — powered by the world's leading AI models. In a market flooded with fragmented tools, Use.AI is the operating layer that brings everything together.

WHAT PROBLEM DOES USE.AI SOLVE?

The modern workforce is drowning in tool sprawl. Teams juggle multiple AI subscriptions, disconnected file systems, and fragmented communication platforms — burning time, budget, and focus in the process. Use.AI eliminates that friction entirely.

AUDIENCE PROFILE

MONTHLY ACTIVE USERS (MAU) — 1M

33%	67%	18-60	10%	5%	36%	25%
work usage	personal usage	age distribution	knowledge workers	founders / executives	students	freelancers

GEOGRAPHY

% TIER 1 MARKETS — 57.2%

Europe (excl. UK). 32.9%	APAC 13.5%	Australia & NZ 2.7%
US 18.9%	UK 6.3%	Africa (Sub-Saharan). 2.4%
LATAM & Caribbean 18.3%	MENA 3.0%	Canada 2.0%

TOP USE CASES

An analysis of Use.AI chats found that 71.3% involved creating or modifying something, while 24.8% focused on finding answers. Just 1.7% involved casual conversation.

23.8%	11.5%	9.4%	7.9%	6.4%
write practical text	edit an image	generate an image	factual lookup	explain a concept

STRATEGIC POSITIONING

Core competitive advantage

Use.AI brings 10+ leading AI models into one workspace, enabling seamless model switching while preserving conversations, files, projects and context.

Why multi-model matters now

AI models excel at different tasks and evolve rapidly. Use.AI simplifies access to leading models without requiring multiple subscriptions or technical expertise.

Dependency on external models

Use.AI combines customized open-source models with leading third-party AI, enabling rapid upgrades, provider flexibility and reliable access.

PRODUCT ROADMAP

Key upcoming features

Native iOS and Android apps are coming soon, followed by enhanced project management, document tools, image generation and app integrations.

Expansion into industries

Use.AI serves students, freelancers, business owners and professionals, expanding AI capabilities for everyday tasks involving documents, research, images and code.

API / integrations plans

Use.AI is expanding integrations with everyday applications, enabling users to connect existing tools and move work seamlessly between platforms.
